

# **Bioinformatics/Computational Biology at the University of Athens: History, Current Educational and Research Activities, Future Perspectives**

**Stavros J. Hamodrakas**

*Department of Cell Biology & Biophysics, Faculty of Biology, University of Athens*

In this talk, I shall present the history, current educational and research activities, and future perspectives of the discipline of Bioinformatics/Computational Biology at the Faculty of Biology of the University of Athens, for the past two and a half decades.

Prediction algorithms, tools and databases developed in my lab during this period, are presented in detail at <http://biophysics.biol.uoa.gr> and are freely available to the academic community.
